MEDICAL

Sensor Technology Platforms

A unique combination of technology platforms delivers innovation and flexibility.

Capabilities

Concept, design, prototyping, firmware, hardware, integration, and world class manufacturing. True end-to-end thinking.

Global HMI Footprint

True global reach with key functions located in strategic geographical regions on all continents.

In-House Manufacturing

In-house volume manufacturing, meeting all major worldwide certification standards.

Fully Integrated End-to-End Solutions

Interlink leads the printed electronics industry in the commercialization of its patented Force Sensing Resistor® technology and has supplied some of the world's top electronics manufacturers with intuitive sensor and interface technologies. One of our biggest competitive advantages and our most important source of long-term revenue comes from our ability to develop and produce custom in-house technical solutions from concept to delivery.

Market Sizing & Growth

The global force sensor market was valued at \$2.156 billion in 2017 and is expected to reach \$3.067 billion by 2023 (CAGR of 5.9%).

Interlink Electronics M&A Focus

Key Investment Considerations

- Leverage over 35 years of brand awareness and experience in printed electronics and technological solutions to offer continuous improvement and ongoing shareholder value
- Acquisitions that will expand our technological and engineering resources
- Penetrate new growth markets (IoT, nanotech, etc.)
- Strong cash balance with no debt
- The ability to launch new product offerings (not limited to sensors)
- Committed to driving growth
